## Acknowledgments

In the process of development, planners and decision makers should be aware of the competition to foster their economy through industrial development in the country. For this reason, it is necessary to analyze the current situation of the established industries with the help of the activities done in the past and set up the future plan for further development. Industries are the backbone of an economy as the rate of economic growth of any nation is heavily depends upon its industrial development. Ultimately, industries help to improve the living standards of the people creating employment sources and generating the national income by utilizing its natural resources. Therefore, information on the current state of the industrial activity is one of the most important ingredients of the process of policy decision making. In fact, the choice of the appropriate policy stance heavily relies on timely and reliable knowledge of what is happening. In this context, the statistical information provided by the official statistical agencies plays a prominent role.

Department of Industries (DOI) is a responsible government organization for the promotion of industries in Nepal, especially, for the development of medium and large scale industries. DOI also encourages Foreign Direct Investment (FDI) and administers their establishment in the country. It also encourages and facilitates the entrepreneurs to register the Trademarks, Patent and Design to protect their Industrial Property right. One important way of facilitating the potential investors, Nepalese as well as foreign, is to provide the credible information on industrial activities in the country. Due to the reason, DOI has been publishing “Industrial Statistics” for two decades. The data and information compiled are mainly based on ‘medium’ and ‘large’ scale manufacturing industries. Previous data and information are revised and updated on the basis of the Department’s records and some field visits.

On this occasion, I would like to request all the concerned industries to provide production data and other relevant information regularly on time. Obviously, timely submission of data will help us to compile and publish the “Industrial Statistics” more correctly in time. Despite many problems encountered during data compilation, we have tried our best to make it as accurate as possible. However, we would regret if any errors have still crept in. We feel that our effort would become successful if the data and information provided will be useful for entrepreneurs, researchers, planners and policymakers working in the field of industrial development in Nepal. Any comments and suggestions for the improvement of this publication will be sincerely acknowledged.

I would like to take this opportunity to express my sincere thanks to all industrial enterprises for providing information/data, without which this publication would be of little value. I am thankful to the directors at the DOI for their cooperation by providing the essential and useful information to the publication. Last, but not the least, I would like to commend the staffs of the Planning, Monitoring & Evaluation Section of the Department, especially, Director-Ashok Dahal and Statistician-Dr. D.R. Aryal, for their sincerity and diligence in bringing out the present episode well in time despite the hurdles encountered during the compilation and processing of the data.
