The rate of economic growth of any nation is directly related to its industrialization. Thus, industries are the backbone of an economy. Apart from providing employment to the people, industries also help in creating national income by utilizing its natural resources. In the process, they help improve the living standard of the people, the prime objective of any development activities.

Department of Industries (DOI) has been publishing *Industrial Statistics* for almost two decades and the present edition, 2074/075 (2017/2018) is yet another link of that chain.

The previous editions of this book were found to be useful to academicians, researchers, entrepreneurs, planners, policy makers and bankers for industrial and economic analysis. We are sure that this Industrial Statistics Book will be equally fruitful too. We look forward to receiving your valuable comments and suggestions for the improvement of this publication in coming edition.

Our sincere appreciation goes to all personnel of this Department and Mr Bed Prasad Dhakal director of CBS, for their notable contribution in bringing out this annual publication.
